About Me

I'm constantly engaging in new projects and ideas to enhance myself and others around me, always having active personal projects and being involved in early stage projects. Love building new things from scratch. I consider myself a fast learner, learning by doing and researching about the subject independently. By being open minded and having a passion for anything Engineering related, I constantly find myself learning new scopes. Interested in creating a unique experience?

Education

MSc in Electrical and Computer Engineering

2013 - 2018

Instituto Superior Técnico

Major in Systems, Decision and Control & Minor in Computers

Second Cycle's Average: 17 MSc Dissertation mark: 19

Academic Merit/Excellence: bit.ly/academic_merit

Master Dissertation: bit.ly/jorgeserras_dissertation

Main Work Experience

Research Grant

Oct. 2018 - Feb. 2019

Instituto de Telecomunicações INESC-ID
meteor.jorgeserras.com bit.ly/DBNMeteor

Funded by: Portuguese Foundation for Science and Technology (FCT)

Associated to the research/development of an outlier detection system from patients with cancer, integrated in project PERSEIDS known as METEOR.

A research article is available: mdpi.com/2076-3417/11/4/1955

Main Technologies:

R Bayesian Networks Shiny - RStudio Java Python

Front-End Developer

Apr. 2019 - Apr. 2020

Forall Phones

Participated in building everything Front-End associated including an internal stock controller app (Opsify), Shopify Design and internal management apps using websockets for real time sales tracking and analytics. Constant improvement and support to increase Production efficiency by optimizing UX and minimizing time consumption.

Main Technologies:

React Redux JS Shopify JIRA Web Sockets Ant Design

Freelancer | Full Stack Developer

Sep. 2019 - Present

Nomad Card City Tribrs
app.nomadcard.city app.tribrs.com

Foreign startup with two products aiming at providing cashback rewards for customers through gamification. Nomad Card is a **PWA webapp** for local businesses (uses GeoLocation and QR scanning) while Tribrs is a **Shopify app** for online stores. All the Front-End and part of Back-End was developed by myself being still an active project.

Main Technologies:

React PWA NodeJS Material UI AWS Stripe MongoDB Figma Shopify

Tech Lead

May 2020 - Feb. 2021

Relive
relive.pt

Leading the Tech Department of a PropTech startup aiming to provide a one-stop-shop real state experience. Our main platform is currently in WordPress while having several internal developed apps mainly for CRM and integrations with other agencies (Idealista, Imovirtual...)

Main Technologies: WordPress PHP NodeJS Ruby on Rails Heroku Web Hooks CloudFlare MongoDB Google Sheets

Co-Founder & Front-End Developer

Mar. 2020 - Aug. 2020

Muvsy

Company started with the aim of revolutionizing the moving sector by providing an intuitive and simple experience to customers. Built all the Front-End while participating in the product definition. Project currently on standby due to COVID-19 :(

Main Technologies:

React Material UI Heroku Figma CloudFlare

Main Skills & Tools

Front-End | Style | WebApp

React Redux Gatsby Next.js Sass CSS HTML React Native Service Workers JS PWA Material UI Ant Design MapBox Web Sockets
